AUTOMATIC SATELLITE & WI FI SYSTEMS

- 4G ROOF ANTENNA AND MI FI KIT WITH CHARGE STATION £449.00
- 5G ROOF ANTENNA AND MI FI KIT WITH CHARGE STATION £549.00

GREATER NETWORK CAPACITY

5G offers 10x the network capacity compared to 4G, in densely populated areas such as cities, stadiums or concerts. 4G sometimes struggles to meet the demands of so many devices in one place.

FASTER DOWNLOAD SPEEDS, LOWER LATENCY

5G presents an opportunity to open the flood gates and offer faster download speeds to meet surges in demand. However, 5G isn't expected to provide any better coverage than 4G.

4G
Upto 300Mbps, although realistically under 60Mbps. 5Mbps or less would stream TV.

5G
Theoretical speeds of upto 1Gbps, but likely to be much less.

4G Pack 2
